

ENGEN DEGREASER EF

DESCRIPTION

Engen Degreaser EF is an environmentally friendly, general purpose de-greasing fluid suitable for cleaning grease and oil deposits in most industrial and automotive applications. Being water based, Engen Degreaser EF has no flash point and is therefore extremely safe to use, particularly in poorly ventilated areas, or areas that pose a fire risk, where the traditional, solvent based degreasers could prove dangerous. It is biodegradable, of medium alkalinity and has anti-static properties to improve its cleaning efficiency.

APPLICATION

Engen Degreaser EF is particularly suited to degreasing of industrial and automotive machinery components and general cleaning in engineering workshops and service bays. It should be used as follows:-

General degreasing

Remove excess grease and oil using a suitable scraper or wire brush. Apply Engen Degreaser EF with a brush or high pressure spray. Allow to stand and rinse with clean water.

Floor cleaning

Apply a reasonable quantity of Engen Degreaser EF with a stiff broom, spreading it across the surface with a little water. Alternatively, spray the area to be cleaned using a high pressure cleaner. Leave to stand and rinse off with clean water. For areas heavily soiled with compacted grease and oil, allow the degreaser to penetrate for 2-3 minutes before brushing again and then rinsing with clean water.

Dip tank cleaning

Dirty components should be soaked in Engen Degreaser EF for up to 20 minutes, depending on the degree of soiling. They should then be rinsed with clean water and allowed to dry.

BENEFITS

- Safety, due to no flash point
- Cost effective
- Multipurpose cleaner for industrial components, engines and floors
- Simple to use with existing methods
- Environmentally acceptable and biodegradable
- Anti-static

PHYSICAL CHARACTERISTICS

Flash point	Non
Specific gravity	1,01
Appearance	Clear colourless liquid
pH	LT 12
Boiling point, °C min.	100
