

ENGEN TWO STROKE SELF MIX

DESCRIPTION

Engen Two Stroke Selfmix is a premium quality, non-ash forming two-stroke motor oil. It is an SAE 40 oil which is prediluted to SAE 20 for rapid mixing with petrol. This makes Engen Two Stroke Selfmix ideal for two-stroke engines where the oil is mixed directly with the petrol in the tank.

APPLICATION

Engen Two Stroke Selfmix is recommended for use in two-stroke motorcycles, scooters, lawnmowers and power tools. The equipment manufacturer's oil/fuel ratios are recommended, but as a general guide, an oil/petrol ratio of 1:25 would be suitable for the above types of equipment.

BENEFITS

- Effective lubrication at all speeds.
- Extended spark plug life.
- Protection against spark plug fouling.
- Protection against rust and corrosion.

TYPICAL PHYSICAL CHARACTERISTICS

SAE No. (with diluent)	20
Viscosity, cSt @ 40 °C	50
cSt @ 100 °C	7,8
Viscosity Index	125
Flash Point, °C	66
Pour Point, °C	-18
Sulphated Ash, % m/m	Nil
